## LONG ISLAND CATCH SOLUTION

---

---

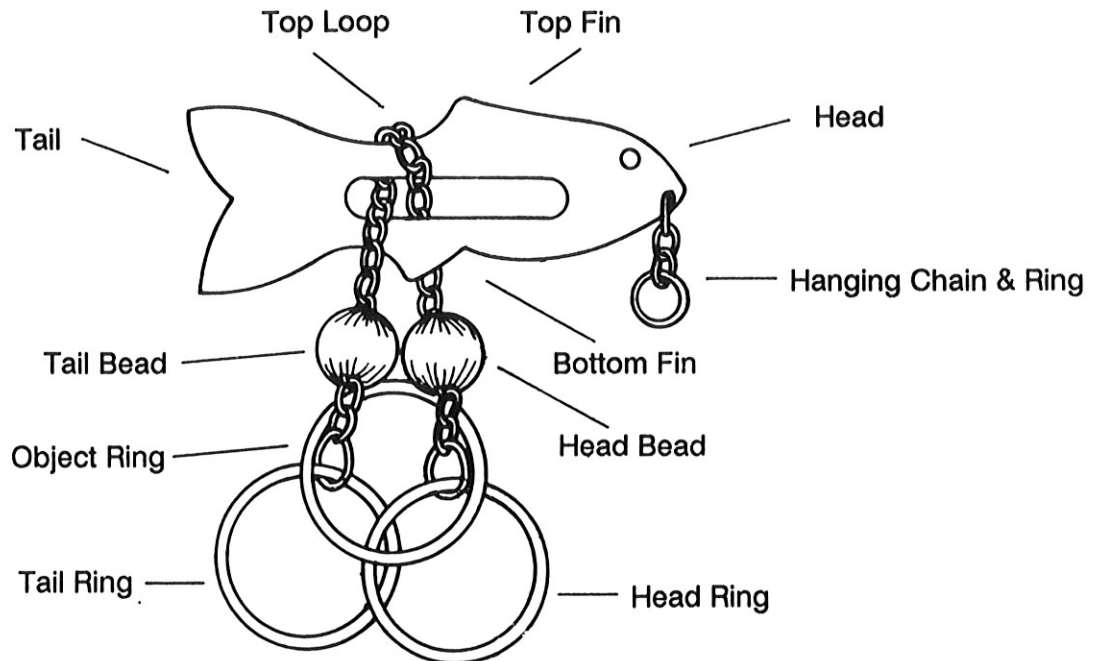

Figure 1

1. Look over puzzle and untangle any knots you may have made in the chain. Lay puzzle flat on a table, with the head to the right and the chain as pictured. Make sure the chain is not reversed and not looped around the fish the wrong way (it happens easily).
  2. Pick up the fish by the tail and turn head down, allowing the chain and rings to hang off head.
  3. Move the object ring up the chain and past the beads, over the head and to the tail. Return fish to flat position.
  4. Move the top loop of chain to the head side of the top fin.
  5. Drop tail ring through slot; adjust the chain to even up the head and tail rings. See Figure 2.
  6. Move the object ring past the bead and head, and down into the chain and rings.
  7. Move the object ring up the chain through the bottom side of the slot. Pass only the top of the object ring over the bead and back down through the top side of the slot to the chain. See Figure 3.
  8. Move the tail ring up through the slot and over the top fin.
  9. Move the object ring up over the head and back to the tail bringing the chain along.
  10. Pass the head ring up through the slot and over the top fin. Adjust the chain so the ring hangs free. See Figure 4.
  11. With the tail ring lying flat on top of the tail, slide the object ring and chain past head. Lay object ring flat on top of head.
  12. Drop object ring through the bottom side of slot first, then remove.

## LONG ISLAND CATCH DIAGRAMS

---

---

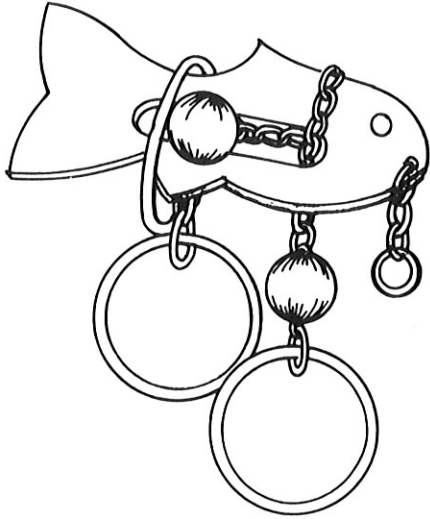

Figure 2

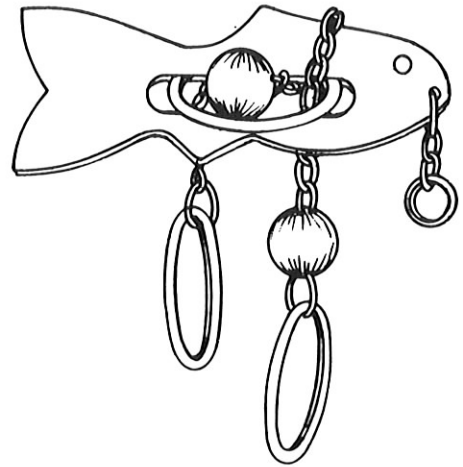

Figure 3

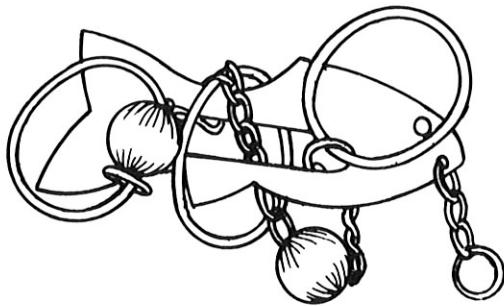

Figure 4

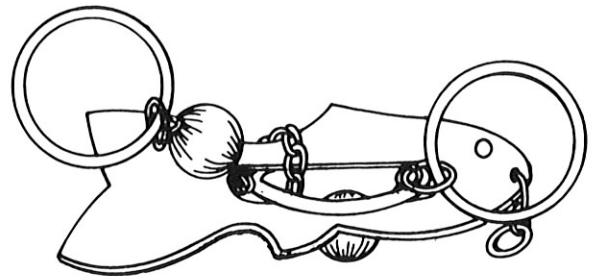

Figure 5

**REASSEMBLY:** Hold puzzle flat with head bead hanging below fish and head ring resting on top of head. Place the head bead through the center of the object ring. Slide the object ring up through the slot until object ring comes to rest on top of fish. See Figure 5. Move object ring over head and back down the fish to tail. Drop the head ring through the slot. Move the object ring down the fish, over the head and down onto the chain. Drop the tail ring down through the slot. Adjust the chain until the rings are even. Move object ring up the chain and through top side of slot. Pass only the top of the object ring over bead and back down chain through bottom side of slot. Move the top loop of chain to the tail side of the top fin. Move object ring over head, down past the bead to the tail. Move the tail ring up through the slot and over the top fin. Hold fish by the tail. Turn head down and allow the object ring to slide down onto chain and rings. Reverse head and tail, keeping object ring with chain and rings. Hang by the hanging chain and ring.
