## WISE GUY SOLUTION

---

---

Identify all parts before beginning. Note that triangle 1 is connected to bail A, and triangle 2 is connected to the U-section

1. Hold puzzle by triangle 2; allow bails A and B to fold together flat. Move object ring from triangle 1 to triangle 2. See Figure 2.
2. Keep ring and triangle 2 together. Fold U-section to sit flat on top of bails A and B.
3. With ring and triangle 2 together, slide both up right side of U-section. See Figure 3.
4. Move ring off of triangle 2 and into center of U-section and bails A and B.
5. Move ring and triangle 1 over to left side, and triangle 2 to bottom of U-section. Eyes and small rings on triangle 2 should line up with each side of U-section. See Figure 4.
6. With triangle 2 on top of U-section, slide triangle 2 up on U-section, and swing the small rings on triangle 2 downward.
7. Move ring into center of triangle 2 (from left side), around bottom of triangle 2, then past right side to remove. See Figure 5.

**Figure 1**

**REASSEMBLY:** Wise Guy is simple to reassemble. Just follow the solution steps backwards. Start with the body of the puzzle positioned as in Figure 5.
